The Disciplinary Committee shall seek to ensure the existence of consistent, effective, fair and transparent complaint procedures and shall act in accordance with natural and constitutional justice.

The decision of the Disciplinary Committee shall be final.

ANIMAL MOVEMENT

All Equines must be Microchipped and have their Passports & Premises Number. All Sheep must have Ear Tags and Dispatch Dockets.

Equine

As from 1st May 2012, any premises (which includes shows, fairs and markets) where horses or other equines are gathered must be registered with the Department of Agriculture. Owners/persons in charge of such gatherings are required to submit a completed application form for registration and to keep records of movements on/off their premises. Records must be retained for at least 3 years as they may be required by the Department for the purposes of tracing disease.

Records required are: The name and address of the owner/person in charge of the premises from which the equine came. Premises registration number from which the equine came. Passport number/UEL number of the animal.

It is important therefore that Show organisers should contact their local Regional Veterinary Office in advance so that consideration can be given to compliance with the requirements.

Any further information on the requirements for moving of horses and equines to shows will be provided on the Department's website www.agriculture.gov.ie/animalhealthwelfare/animalidentificationmovement

HSI/DAFM funding will only be provided for animals registered in a studbook with a breed code recorded. This can include main section studbook equines OR supplementary section studbook equines. Animals with breed code "UNK", whether breeding is recorded or not, will not be eligible for funding under this initiative.

Sheep

Identification

All sheep must be identified individually with appropriate ear tags issued in accordance with the requirements of the National Sheep Identification System (NSIS).

Movement Documentation

All consignments of sheep being moved must be accompanied by a completed dispatch document. Individual details of each sheep in the consignment must be recorded on the document. Sheep from non-restricted flocks only can be moved to shows. In the case of flocks restricted following diagnosis of scrapie, sheep possessing the ARR/ARR genotype only may be exhibited. The movement of these ARR/ARR genotype sheep must be accompanied by the relevant movement permit (SCR/10), which can be obtained from the local District Veterinary Office in the county where the flock is located.

AIM Notification

The movement of sheep to and from an Agricultural Show within the State must be recorded on AIM. This is done using a copy of the owner's sheep dispatch document as follows:

1. The owner/keeper presents the signed and completed dispatch document to the show secretary who checks it to ensure that it is completed in full.
2. The show secretary fills in the MART section of the dispatch document with (i) the show number, (ii) the date of the move back to the source holding (iii) stamps it with the show stamp and (iv) signs the dispatch document.
3. The show secretary then forwards the completed pink section of the dispatch document to the local DVO within 7 days of the show movement.
4. The show secretary keeps a white copy for his/her records.
5. The source/destination keeper keeps the bottom yellow copy to enter it into their flock register. Ultimate responsibility for fulfilling this requirement lies with the Show Secretary.

Flock Register

All movements of sheep to and from shows must be recorded in the keeper's flock register.

Exports to Northern Ireland

All sheep must be accompanied by a TRACES intra-community trade certificate for ovine animals. A TRACES message, corresponding with the TRACES certificate, will be sent for each animal or consignment being dispatched to the show (this will be performed by Department officials of the DVO). Exhibitors are advised to contact the show society in Northern Ireland well in advance of any show to determine the suitability of the show for return of animals (e.g. premises and sheep status), and whether the authorities will have officials and veterinary staff present to supervise and process documentation for animals returning to origin.

Attendance of sheep from scrapie monitored flocks at shows and sales in 2024.

Shows between 1st May and 31st October - Sheep from Scrapie Monitored Flocks will be permitted to attend Agricultural Shows taking place between 1st May and 31st October, without restriction or separation from other categories of sheep.

Shows outside of the 1st May and 31st October Period - For shows taking place before 1st May or after 31st October, sheep from Scrapie Monitored or Probationary Flocks must be separated from other sheep as set down below.

- a. There must be complete separation of Monitored/Probationary sheep from other categories of sheep at the show. Ideally, this would mean a separate entrance and exit for each group, separate loading and unloading areas, separate penning areas for each of the two groups and separate sale rings for each of the two groups.
- b. In locations where all of the above may not be possible, the minimum requirement would be for separation of loading and unloading areas and also of penning areas. The two penning areas should be separated by a sheep-free alleyway by at least 12 feet wide. If only one show ring is available, the sheep from the scrapie-monitored flocks must be shown first.

Sales between 1st May and 31st October - Sheep from Scrapie Monitored Flocks will be permitted to attend sales taking place between 1st May and 31st October, without restriction or separation from other categories of sheep.

Sales outside of the 1st May and 31st October Period - For sales taking place before 1st May or after 31st October, sheep from Scrapie Monitored or Probationary Flocks must be separated from other sheep as set down below.

1. There must be complete separation of the two categories of sheep at the sale (monitored animals including probationary monitored animals and non-monitored animals). Ideally, this would mean a separate entrance and exit for each group, separate loading and unloading areas, separate penning areas for each of the three groups and separate sale rings for each of the three groups.
2. In locations where all of the above may not be possible, the minimum requirement would be for separation of loading and unloading areas and of penning areas also. A sheep-free alleyway should separate the two penning areas by at least 12 feet wide.
3. If only one sale ring is available, the procedures set out in the following two options must be adhered to.
 - a. The sheep from the Scrapie monitored flocks must be offered for sale first, followed by non-monitored animals or
 - b. The ring can be divided by gates into two sections to ensure that each of the two categories of animals is confined to a unique part of the sales ring.
